

## Reshaping and Contouring

There is an option for the many patients who just want minimal changes to the look and shape of their teeth called tooth contouring, which can be done in addition to professional tooth whitening. This oral health treatment is pain free and can be accomplished in a matter of minutes while offering solutions to small chips, uneven edges and sharp corners. Contouring is one of the most economic solutions to minor cosmetic issues and can move you closer to a more beautiful, healthy smile!
